

V3TS are looking for registered nurses to join us at our veterinary hospital, in the beautiful coastal city of Larnaca, Cyprus. The clinic is situated only 10 minutes from the nearest beach and with 330 days of sunshine a year, you can really take advantage of the true Mediterranean lifestyle!

About us:

V3ts Veterinary hospital is the biggest and most modern clinic on the island. There are 12 vets, 5 nursing assistants, 1 HRVN and 7 receptionists. We specialize in both orthopaedic and neurosurgery. Being the only clinic to have both MRI and CT on site, we also operate as a referral service for other clinics across on the island. On site we also have ultrasound, endoscope, Laparoscope, full laboratory facilities and access to a blood bank. We also run our own OOH and emergency service meaning we see a full and varied caseload.

What we are looking for:

The role would suit either new grad nurses, looking to further advance their skills or more experienced nurses looking for something new. All we ask is that your confident and willing to learn. We are a busy practice with a high inpatient caseload so good knowledge of basic inpatient care is crucial. For those with an interest in schedule 3 procedures there is a real focus on using registered nurses to their full potential. In house training can also be given for those wanting to learn. Here at V3ts we want to actively help push forward the nursing profession in Cyprus as training is currently very limited. We believe having registered RVNs will help us do this.

The Role:

- Full time 40hrs. Shift work involving some back shifts (3pm-11pm).
- We are also looking for OOH/night nurses. Night shifts are limited to 8hrs and rota is very flexible to ensure adequate time off.
- Mainly inpatient care based but options to be put on surgical rota if interested.
- lots of opportunities for schedule 3 (full training provided)
- 1 Saturday a month and one full weekend a month
- Wage dependent on experience (Range from €1200 to 1400 a month)

Benefits:

- CPD allowance and in house training.
- Accommodation can be provided (within walking distance from clinic, €500 -550 a month including all bills).
- Use of practice car at first.
- 21 days annual leave.
- Generous staff discount.
- Sick pay (paid at 70% of salary)
- Access to GESY (Cypriot health care system – all sorted via employer).
- Maternity/paternity pay.
- Life assurance.
- All visa requirements sorted through employer.
- Very low living costs. Cyprus has one of the lowest tax rates in Europe and general day to day life is considerably less than the UK.
